

CONCRETE SEALER

Clear, water-resistant sealer for concrete

Product Description & Use

Triton's Concrete Sealer is used to seal new and existing concrete surfaces prior to application of the TritoFlex 2K or 1K liquid rubber waterproofing membrane. It may also be used on cement or wood. It dries clear and provides early water resistance.

Concrete Sealer can be applied by roller and by airless sprayer. If applying with a sprayer, use a size 17 to 21 tip. It is recommended to thin with water 50% or 1:1.

Substrate Preparation

Substrate should be clean and free from oils, grease, dirt, and debris before the application of Concrete Sealer.

PHYSICAL PROPERTIES	TYPICAL VALUE
Viscosity	80-90 KU 30-50" #2 ZC @ 1:1 Mix w/Water
Color	Clear
Gloss @ 60 °	Flat
Weight/Gallon	8.38 lbs.
Solids by Volume	19.5% average
VOC's	3.20 lbs./gal; <385 grams/liter
Coverage Rate	313 sf/gallon at 1 mil dry
Dry Time @ 70 °	2-4 hours to handle 24 hours to recoat
Available Size	5 gallons (19 liters)
Thinning & Cleanup	Water or Butyl Cellosolve
