

INDUSTRIAL FACILITIES

Overview

Triton is renowned for engineering roof systems that are stronger and safer than conventional options, and last in the harshest industrial environments. Our repair, restoration, and recover solutions upgrade and waterproof existing roofs with increased durability, flexibility, and resistance to acids and chemicals.

Triton's industrial-grade, non-toxic products are ideal for industrial facilities, as they commonly have numerous penetrations, high foot traffic, chemicals, and frequent changes to roof-top equipment. Our TritoFlex Rubber products feature:

- High flexibility and elongation (>1200%)
- High tensile strength and puncture resistance
- Excellent acid and chemical resistance
- Class A Fire rating
- Hail-resistant warranties
- Slip-resistant surfaces
- Zero VOC's or solvents
- No odors or hazardous fumes
